System requirements

- USB port
- Windows 98, ME, 2000, XP or MAC OS

Hardware installation

- Please plug the rectangular USB connector into your computer's rectangular USB port
- The device could be detected automatically by PC without needing the driver

General information

- Build-in DC 1.5V battery. The device can be used normally without having too change the battery for a long period of time
- The device applies to account by normal operations, such as "+,-,*,/,%"; memory operations, "M+,M-,MR,MC"; and tax calculations like tax-set, tax-reference, calculating before tax-in, and calculating after tax-in
- The calculator mode (CAL) applies the normal calculator function. After connecting it to a PC via the USB cable, you can send the results showed on LCD to the PC to either input or edit the data

- Press "SEND" to send the results from LCD to PC, the input method should be in "English/Mathematics" mode
- Press "MODE" to choose the mode for operation:
  - Connecting this device via USB cable to PC, when it shows "PC-KEYPAD", it is then set in the KEYPAD mode
  - After pressing "Mode", the words "PC-KEYPAD" will disappear on LCD. It is then set in the calculator (CAL) mode
- The device will automatically turn off after 6 minutes if no movement was detected
- To transform number key and direction key press NumLock

Keypad NumLock off		←		→		
CALC	+	1	2	3	.	0
Keypad NumLock on	ENTER	1	2	3	.	0
Keypad NumLock off		END	↓	PgDn	DEL	INS

TAX Functions

How to set the tax rate:

- First press the "AC/ON" and then press "TAX+", "TAX%" will be flashing now in the left-upper angle on the LCD
- Now please input the tax rate you want to set, then press the "TAX+" again, after the "TAX%" is stable, the setting is completed. Ex.: AC/ON TAX+17(tax rate) TAX+ (Tax-set completed). You can check the current tax-rate setting anytime by pressing the "AC/ON" and then pressing "TAX-"

Calculating the amount before tax-in:

Input a figure, such as 1000, and then press "TAX-". Now it shows the amount before tax-in. Then press "TAX-" once more, this is the tax amount. After pressing "TAX-" once again, it will be back on the tax-in amount, 1000.

Calculating the amount after tax-in:

Insert the amount, and then press "TAX+". It will show the amount after tax-in. When the "TAX+" is pressed once again, the tax amount will appear. After pressing the "TAX+" again, it reverts back again to the amount before tax-in
